PROFILE INFO

Pursuing my bachelor's degree in computer application, I'm a 4th year student very much willing to be trained and receive hands on exposure. I'm aiming to leverage my knowledge and skills to successfully fill the internship at your company.

ACADEMIC PROJECT

License Tracker

To track licenses, a web-based application is employed. The ability to look up licenses and get alerts regarding road conditions is this project's key feature. Examine the total amount collected from a fine as well as the number of times a person has broken traffic laws. The Laravel Framework is used to build it, while MySQL is used as the database.

Health-care System

The hospital-specific website is the healthcare system. The key components of this project are online appointment scheduling, doctor search, and data storage for patients. React is used to build the frontend, while Java API is used to build the back end. This project wasconstructed using the MVC pattern.

MY SKILLS & FAMILAIR TOOLS

- HTML and CSS
- Figma
- Git and Github
- Postman
- Java Script
